Program Information

Program Name: Enter the specific, formal program name of the program. Spell out abbreviations and avoid acronyms or nick-names. For example: “Residential Substance Abuse Treatment (RSAT)” or “Functional Family Therapy.” (Give the name of the specific facility or location if appropriate.)

Program Description: Summarize key elements of the program. For example: “T4C (Thinking 4 a Change) is an integrated, cognitive behavioral change program for offenders that includes cognitive restructuring, social skills development, and development of problem solving skills.”

Intended Outcomes: Enter the names of outcomes that the program is intended to address, based on outcomes that are measured in the Results First BCA model (ie, crime/recidivism, child maltreatment, out-of-home placement, substance abuse, mental health, public health, public assistance, employment and workforce development, and, or health care).

Oversight Agency/Department: Enter the name of agencies in charge of the program. For example, Department of Corrections, Court Support Services Division, etc.

Start Year: Enter the year that the program first began in Connecticut.

Service Provider(s): Enter the name of the oversight agency if the program is delivered by staff unless the specific program is contracted, in which case, name the contracted provider(s).

Program Fidelity: Is the program delivered with fidelity to the program design? Enter yes or no. If yes, explain how the fidelity is ensured.

Average Duration of Program: Enter the length of time required for program delivery. For example: “6 – 12 months” or “12 weeks”. At first, the inventory will contain a variety of measures – days, months, or years. Later, these should be standardized to months or years to use as inputs in the benefit-cost model.

Frequency/ Intensity of Program: Record the number and duration of classes or sessions. For example: “Ten 30 minute classes administered over four weeks.”

Program Last Evaluated: Enter the year that the program was last evaluated. Enter “never” if the program has not been evaluated. Provide copies of any program evaluations.

Notes/Comments: Provide any other relevant detail to help explain the program.

Participants & Capacity

Primary Participant Population: When compiling the program inventory, it is important to include information about which populations are intended for each program. Sometimes programs are given to individuals who are not the appropriate recipients for the treatment. For example, low risk offenders with little likelihood of reoffending are often included in re-entry programs intended for middle to high risk offenders simply because they are a more manageable population; however, including low risk offenders in inappropriate programming can actually increase recidivism. Describe the intended risk classification or other qualifying classification for participants. For example: “Moderate-High Risk Offenders” or “Drug-involved Offenders” or “Youthful Offenders (Age 18-25)” etc.

Average Age: Enter the estimated average age of a program participant (regardless of completion) in state fiscal year 2013 (or the same year for which *Participants Served in FY13* is reported).

Criminogenic Needs Addressed: List the specific needs that the program intends to address. For example: Addiction disorder; psychiatric disorder; unemployment; domestic violence perpetration, etc. Also note the intended treatment population.

Assigned Using Validated Assessment Instrument: Name the screening/assessment tool used for assignment participants to the program, if a tool is used. For example: LSCMI, SASSI, etc.

Participants Served in FY13: Report the number of clients the program treated (regardless of completion) in state fiscal year 2013 (or 2014—whatever may be the most recent full year of data available).

Eligible but Unserved Individuals: Report the estimated number of persons in the program’s service jurisdiction that would qualify for or need this program, but who did not receive it. This may simply be a wait list. The estimate should represent an annual count from a single calendar or fiscal year.

Annual Capacity: Report the annual number of program slots or beds available at any given time as it is currently funded.

Notes/Comments: Provide any other relevant detail to help explain the program and its capacity.

Cost & Budget

Program Budget (FY13): Indicate the total amount budgeted by the agency for the program for the year that is used for the cost estimates.

Percent of Total Budget (FY13): These cells are computed automatically to estimate the portion of the total agency budget related to the program.

Annual Cost per Participant: Record here the estimated annual cost of the program per participant.

Marginal or Average: Note the method of estimating the per participant unit cost for the program. Marginal if based on variable costs only or average if based on variable and fixed (overhead) costs.

Funding Source: List the source of program funds, e.g., legislative appropriations, county appropriations, user fees, federal grant, etc.

Annual Cost per Participant for Comparison Group: Enter costs of alternatives to the program if the program is used as a diversion or replacement from some other resource that would otherwise be used. For example, electronic monitoring may be used instead of jail to detain pre-trial defendants. The comparison cost would be the cost of jail for the same amount of time that the defendant would be on electronic monitoring.

Year of Dollars: This is the calendar or fiscal year of information used to estimate costs.

Description of Program Costs (e.g., how calculated): Enter notes describing how per participant costs were calculated.

Notes/Comments: Provide any other relevant detail to help explain the program cost.

Evidence-Based

Policy area: Identify the policy area that best describes the program's focus. See the program summary documents for further details.

RF Program: Select the name of the RF program that best matches to the state's program. Descriptions of RF programs are provided in program summary documents. The program list is populated based on the policy area selected in the previous column.

Clearinghouse: Enter the name of the clearinghouse or clearinghouses that reviewed the intervention. Further details found here under "Clearinghouses": <https://www.pewtrusts.org/en/research-and-analysis/data-visualizations/2015/results-first-clearinghouse-database>

Rating from Clearinghouse: Note the level of evidence for program effectiveness as indicated in RF's Clearinghouse Database. Further details available here under "Ratings Colors & Systems": <https://www.pewtrusts.org/en/research-and-analysis/data-visualizations/2015/results-first-clearinghouse-database>

Type: Enter the type of program: evidence-based, research-based, or promising. An 'evidence-based' program incorporates methods demonstrated to be effective for the intended population through scientifically based research, including statistically controlled evaluations or randomized trials. All programs in the RF model are evidence-based. A 'research-based' program is a program or practice that has some research demonstrating effectiveness, such as one tested with a single randomized or statistically controlled evaluation, but does not meet the full criteria for evidence-based. Finally, a 'promising' program is a program or practice that, based on statistical analyses or preliminary research, shows potential for meeting the evidence-based or research-based criteria.
